

American PetroLog, LLC has recently expanded its operational footprint by opening a transload and storage facility in the Dallas-Ft Worth market. This site, which is centrally located in Venus, TX, allows for efficient and cost effective distribution service throughout Texas, Oklahoma, Arkansas, Louisiana and Mexico. This 7½ acre site is serviced by the Burlington Northern Santa Fe (BNSF) railroad and is easily accessed from I-35, I-20 and State Highway 67.

Site Features

- ✓ On site truck scale
- ✓ Compressed air for transloading
- ✓ Nitrogen for transloading
- ✓ Compressed air for sparging
- ✓ Container yard & trailer storage services
- ✓ Repair & maintenance services for trailers and chassis
- ✓ Security fencing, lighting and 24/7 monitoring
- ✓ Railroad switching five days a week (Monday - Friday)
- ✓ Tanker, dry bulk, van and flatbed delivery services

Our facility provides expert transloading and/or storage capability for bulk liquid and dry bulk products, intermediate chemicals, hazardous commodities by qualification, coils, i-beams, pipe, bailed paper, crane mats, lumber, paper rolls, roofing materials, rubber, scrap metals, sand, grain and plate steel.
