

We combine experience, innovation and customer commitment in everything we do.

Avro GSE supplies advanced aviation ground support equipment in North America with a special emphasis on Canada, where the company maintains a strong local presence. We keep aircraft operations working efficiently and help our customers avoid costly downtime caused by outdated or malfunctioning GSE. We provide equipment service that is timely and cost effective and we help customers modernize their GSE with advanced technology to maximize its reliability, operational efficiency and overall safety.

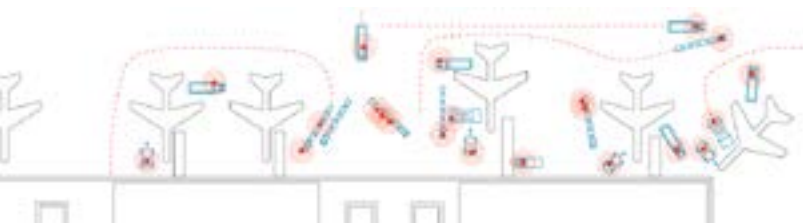

**We reduce
downtime,
increase
efficiency,
maximize ROI
and provide
superior
customer
service**

Why are we different?

We are a full-service supplier with a 25-year history of equipment sales & support. We operate across Canada and provide local parts and service for all of the equipment we offer. We have innovated new and flexible ways to acquire and maintain GSE and we have established exclusive partnerships with some of the most advanced equipment manufacturers in the aviation industry.

We take care of the ground so your business stays in the air

Our Avro-Tracker fleet management system provides a truly proactive approach for maintaining GSE and extending its useful life. This exciting new technology enables monitoring, tracking, maintaining and controlling equipment to reduce cost, improve efficiency and ensure safety. Avro-Tracker can be used to enhance an existing fleet or maximize the ROI of new GSE.
