

EW30950-NA

QuickNetCase® Quick Deploy Emergency Wired / WiFi Network Communication Case

Automatically connects to the nearest cell site via LTE, 4G, or 3G service. Works with all major carriers (AT&T®, Sprint®, T-Mobile®, Verizon, PTCRB) as well as partner carriers throughout the Caribbean.

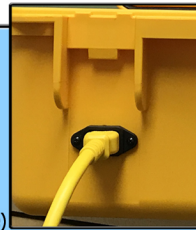

QuickNetCase® provides wired network connections as well as a WiFi hot spot.

Password-controlled bandwidth to allow multiple users to connect and share available bandwidth.

Allows staff and emergency personnel to quickly connect their wired/wireless devices back to the real world.

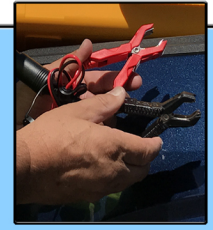

Multiple Standard Power Options
(Optional Solar Solutions Available)

120 VAC Power Cord

12-Ft. 12 VDC Cigarette Lighter Plug

Jumper Cable Adapter To 12 VDC Battery

Front Panel:
Dual USB Charging, Voltage Meter, Weatherproof RJ45

QuickNetCase® is completely configured and ready to operate inside of a watertight Pelican Storm Case™ (airplane carry-on friendly).

Applications:

Disaster sites, construction sites, emergency response vehicle gear, temporary events, survey teams, Office of Emergency Management (OEM), federal, state, and local onsite backup communications.
