AO HYBRID COOLERS

AO Cooler's New Hybrid Cooler is the first of its kind.

The rigid soft cooler is a hybrid between a hard cooler and a soft cooler.

The 3 inch rigid insulation along with the thick outer material makes the cooler perform like a hard cooler, but with the lightness of a soft cooler.

Weighing 8.5lbs. compared to 20 lbs. for a hard cooler. This makes it easier to carry to and from your boat. Welded TPU material and a molded EVA bottom, making it easy to carry, also makes it durable and eco-friendly. Water resistant YKK zippers.
