

Seamless IR Integration

Investor Relations

B2i's Investor Relations tools and automation allow the display of real time data to website visitors without additional work on your behalf. Our solutions are offered as a convenient and cost effective bundle or can be selected a-la-carte to meet your specific requirements.

If you already have an IR website, select from our easy to install plugins developed for WordPress and most other CMS platforms to expand the functionality of your existing website and save you time with automation. We can also create and host a custom IR website for you with our talented design team.

Additionally, we offer design and hosting services for your entire corporate website with the goal of making it more engaging and informative to your site visitors, as well as making it mobile friendly. For B2i hosted sites, our single application allows you or your team to easily update and make website changes or you can opt to have our Managed VIP service handle everything for you.

"Our investor relations clients that use B2i's website services enjoy a fully compliant and customizable IR solution.

B2i's IR solution is more cost effective versus most other providers and their technical service is exceptional."

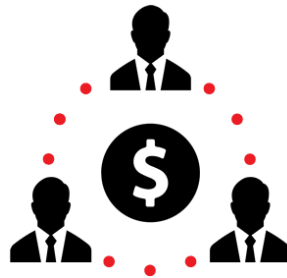

Matthew J. Dennis, CFA

Senior Managing Director

Clear Perspective Group, LLC
