Imagine an app that shows you the best photographic vistas available based on your location. No matter where you are in the world, one of over 10,000 photogenic locations are in the palm of your hand. Each location carefully selected, vetted, and verified by our team of photographers. Stop spending hours surfing the internet, driving around aimlessly, or flipping through travel guides. Open the app, pick a spot, and go.

PIXEO FEATURES

Find Locations

Finding the right place to shoot takes hours. PIXEO solves that problem with an intuitive interface that allows you to browse, contribute photos, and add new locations from your phone. PIXEO is the first and only app of its kind.

A Portable Photo Map

PIXEO is the only photo map you can carry in your pocket. Integrated with the Maps app, when you find a spot you like simply press the Get Directions button. The location will open and give you turn by turn directions to the photo site.

Find Inspiration

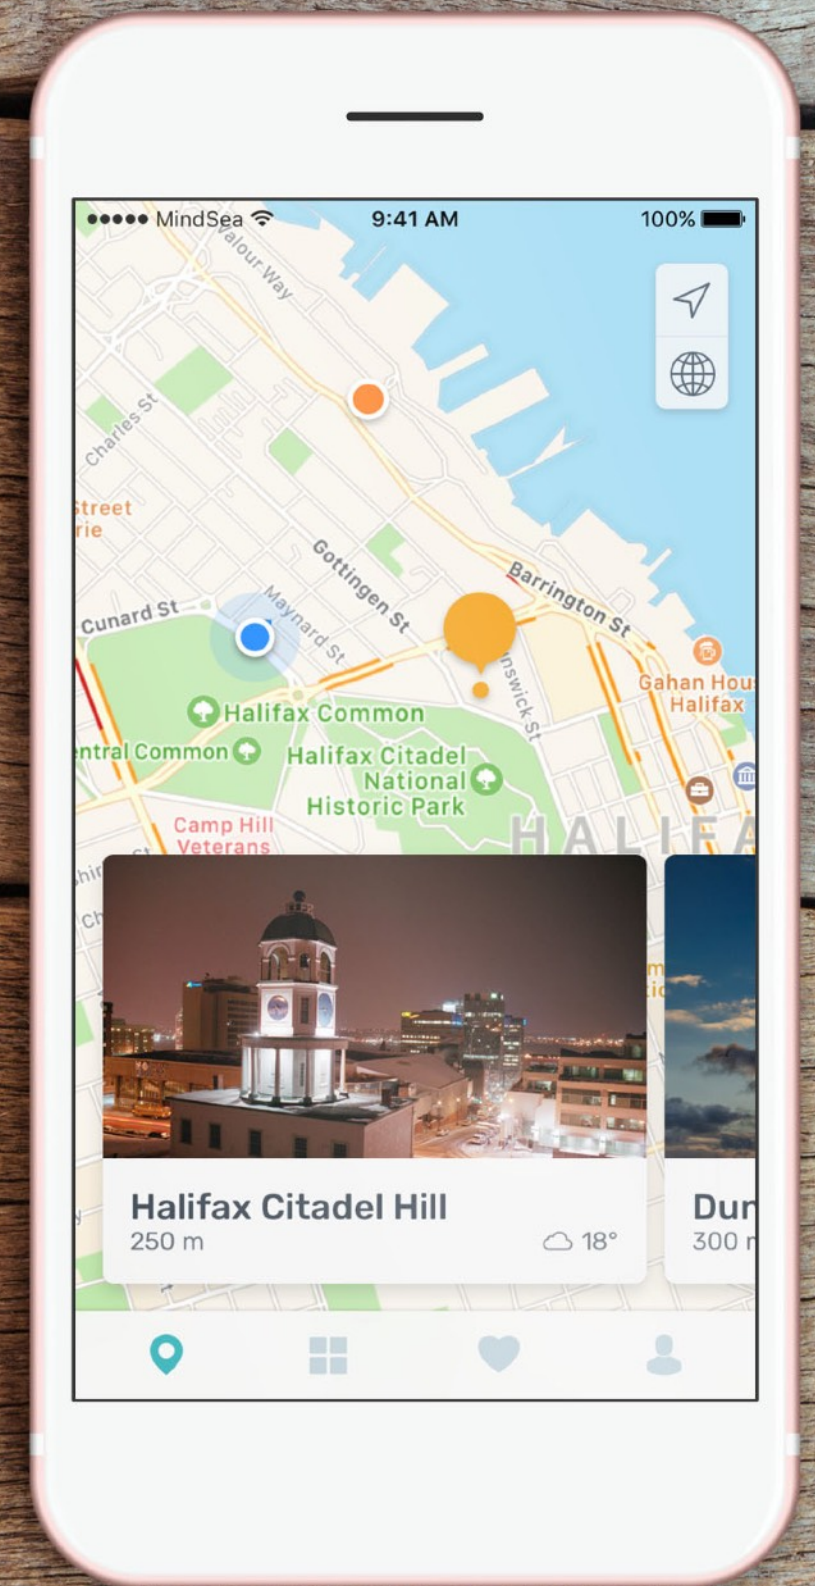

Don't guess what the location will look like when you get there or speculate on what the best time of day to visit is. See for yourself by perusing each location's image gallery to see other pics taken by PIXEO users. Gain insight, inspiration, and ideas from the community.

Location Feedback

Never drive or hike for hours again to get to that abandoned building only to find that it has been torn down, blown away, or succumbed to the elements. Each location permits feedback that we monitor to ensure the collection is current and useful.

Favorite Locations

Planning a trip abroad and want to take some photos while you're there? Browse the map, preview, and save your favorite locations for later. Plan your shooting adventure anywhere around the globe before you even board the plane.
