We specialize in providing Game Customer Support and Tech Support services.

Video Games testing

We specialize in providing thorough regression, functionality and gameplay testing across all platforms.

Compliance and Compatibility

We provide compliance and compatibility testing for web, apps and games.

The Vision we Follow

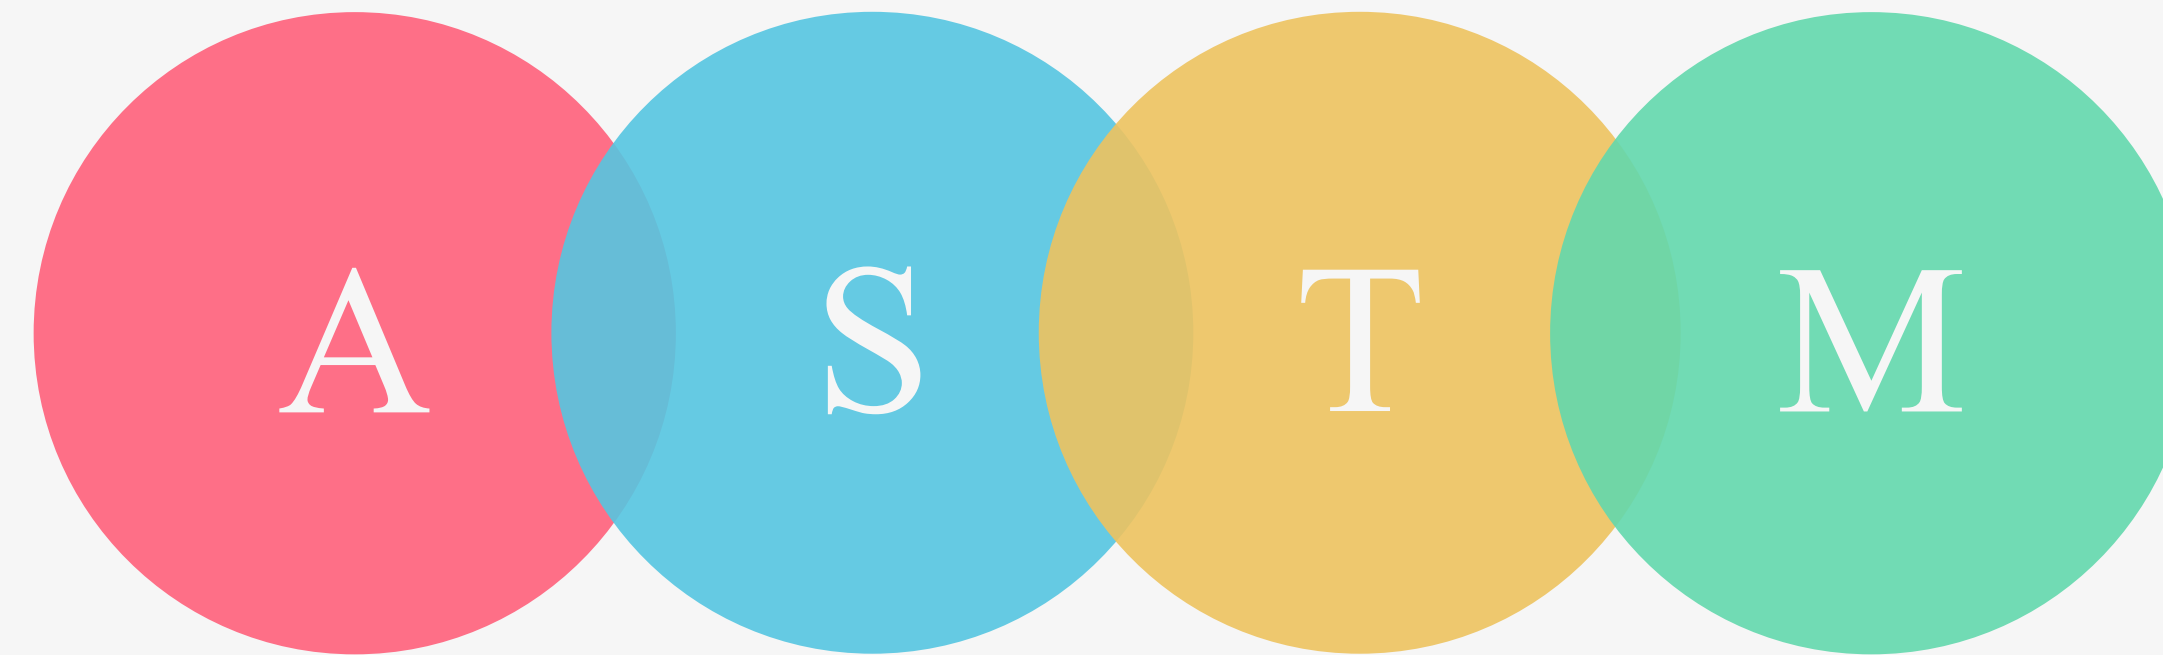

The vision of our company : Active, Strategy, Time, Mobile

Active Community

We believe in keeping a healthy relationship with our customer. We have an active FB page with regular updates to our customers.

Time is Money

We are very particular about deadlines. Its is our endeavor to finish every project within the given time and deadline

Strategical Moves

We build relationships with specific partners depending on the product that we are about to launch.

Being Mobile

We believer the mobile market is at its peak but will still continue to rise. We have all the resources to make apps and games for iOS, Android and Windows.

What is Our Process?

The same process is followed across different products

01

Brainstorm

Every new idea is discussed and iterated within the team to come up with reasonable time and cost estimates

02

Research

A thorough research is done to find out the business strategies and references needed to design the game..

03

Design

With the help of a concept artist and a designer, a mock up of the game is made. After that a vertical slice is created as a proof of concept

06

Submission

When the QA signs off the game, the game is then deployed to the platform.

05

Testing

The testing phase begins with repeated regression and bug fixing.

04

Development

The development phase begins with fixed deadlines and iterations in mind
