

**FOR IMMEDIATE RELEASE**

**April 2, 2018**

**ExpenseAnywhere Leads the  
Travel Expense Management Solutions Market Again!  
This Time With Built-in Machine Learning Technology and  
ONE-CLICK Expense Reporting**

*The newest release is a showcase of the company's long history of visionary leadership and technology innovation, delivering exceptional value and user experience.*

Pittsburgh, April 2, 2018 – ExpenseAnywhere, the market leader in accounts payable automation solutions, announced today the availability of its flagship product, ExpenseAnywhere Release 12. With this Release, new and existing customers from across all industry sectors and markets will benefit from the most advanced solution available for automating the business travel and expense management.

Dr. Ashok Dhar, President, and CEO of ExpenseAnywhere said, “Release 12 sets a much higher standard in Travel and Expense Management for our customers and us. In addition to the more modern and streamlined user interface, we’re proud to announce the most advanced One-Click Expense Reporting. The advanced OCR and Machine-learning technology incorporated in the Release 12 automatically captures and compiles the expense report consistent with company policies ready for submission in less than 15 seconds of the click of a button.” Dr. Dhar further said, “Our customers who have upgraded to Release 12 are highly impressed with the level of sophistication and automation we have delivered to their organizations.”

ExpenseAnywhere Release 12 delivers a fully integrated turn-key, cloud-based travel and expense management solution providing online travel booking, automated pre-travel

authorization for a total cost of travel approval, to One Click Expense Reporting, to reimbursement for expenses to employee's bank accounts and payments to corporate cards. Compared to the competition, who use mechanical Turks to enter receipt data causing significant risks for companies who value privacy and security, ExpenseAnywhere Release 12 instantly and automatically translates with almost 100% accuracy the paper receipts, including the hotel folios, and validates and verifies them against the company policies without anyone ever touching them.

ExpenseAnywhere Release 12 is a truly global solution – One global codebase- that can be easily configured for use in any country, incorporating country-specific features including tax tracking and reclamation, substantially reducing training, maintenance and support costs for our clients.

#### About ExpenseAnywhere

ExpenseAnywhere, headquartered in Pittsburgh, PA, and with offices in Canada, Europe, and India, is a world leader in the automation of corporate spend management processes. ExpenseAnywhere solutions serve private and public sector customers of every type and size, and reduce operating expenses by automating travel and expense management, purchase and pre-paid card management, and procure-to-pay process management. Each implementation delivers a total turnkey solution that saves money, mitigates risk, and provides business data and intelligence that lead to more-informed financial decisions.
