G-TEX Construction Lands On The Cover of Build Houston!

Eugene, OR, **Conveyor Application Systems** (www.slingers.com) is pleased to announce **Conveyor Applications Solutions** (CAS®) customer, **G-TEX Construction**, www.gtex.com, has landed on the cover of the **Associated Builders and Contractors, Inc.** (ABC) June/July 2018 issue of **Build Houston Magazine**, www.buildhoustononline.com (page 17), for their innovative and technologically advanced construction practices. Featured in the **G-TEX Construction** story is the highly innovative off-road Slinger, the **CAS® AT7**. According to Mike Groschke, Owner/Chief Operating Officer, "We are constantly on the lookout for new ways to improve production and streamline work-flows." Mike went on to mention that the **CAS® AT7** is one of his "favorite pieces of equipment" and can attest to the strong capabilities of the **CAS® AT7** and its ability to help **speed up production** and **reduce the need for excess labor**.

CAS® Director of Sales & Marketing, Don Lindsey stated: "G-TEX is a leader within the construction industry and we are honored to have the opportunity to partner with a company that strives to have the most technologically advanced equipment fleet in the industry." "G-TEX deserves all the accolades and recognition they can get and we are excited for their future as they continue to incorporate technology into their projects, so they can continue to lead the industry and provide such superior customer service while getting the job done ahead of time and below budget."

Conveyor Application Systems (CAS®), based in Eugene, Oregon, is a leading manufacturer of on-road, off-road, and reload conveyor "Slingers" in the world and is the only Slinger manufacturer located in the **United States of America**. CAS® is owned and operated by a third generation at Rexius Corp., www.rexius.com, which is a nationally recognized, full-service provider of landscape materials and services.
