

The OPL and Commercial Laundry Dispenser for the digital world.

St. Louis, MO – July 9, 2018 – Introducing the latest laundry system from DEMA Engineering Company, Trident. Trident is the technology rich laundry dispenser for the digital world. Designed for On-Premise and Commercial Laundry applications alike, it's a forward-thinking platform with Bluetooth technology for use with iPhones, iPads, Android devices and PC integration. Connecting to your smart device you can write and store programs, access real-time data, get service reports, reminders and much more.

Trident enters the “smart device” connection and control era with a forward thinking program using Bluetooth technology for iPhone, iPad, Android devices and PC integration. Use your smart device to write and store programs, get service reports and access data from the Trident Pro-Access interface module. The Pro-Access controls up to 8 pump stands with 2 flushes or 10 pumps without flushes. Trident blends smart device capable technology with the best features of DEMA's legacy dispensers such as quick change pumps and durable pump gear motors.

Shown with 5 pumps and a flush

Trident is a platform to build on for the future with innovative features coming soon like Multi-Machine capability, Pump Expansion Modules and Integrated Sensor Technology for proof of flow, delivery and much more.
