

FOR IMMEDIATE RELEASE

Miami, Florida, November 2018

KINU® Presents Their New Lightweight Coffee Grinder: “M47 Traveler”

- Kinu presents their smaller, more affordable, aluminum body grinder for travel.
- M47 Traveler requires less force to operate due to an improved thumb stopper.

Almost half the weight of the M47, the new “Traveler” is the perfect choice for outside grinding without compromise on the quality and ease of operation, as expected from Kinu Grinders.

The new “Patent pending” thumb stopper reduces the force necessary for grinding, adapted to a wider public, while still taking advantage of the speedy 47mm burr set. Light roast lovers will be happy too...

Same mechanical construction and burr size as the M47, the Traveler serves a nomad community of coffee lovers in their quest for flavor on the go with precision and craftsmanship.

Please visit our website: www.kinugrinders.com for the complete range of grinders.
