

## TimeLinx Accepted into Infor's Micro-Vertical Product Program

*Program provides TimeLinx with access to Infor's 700+ member partner network*

North Andover, Mass., Jan. 28th, 2019 -- TimeLinx, an industry leading project and service management software platform designed for the mid-market, today announced it has been accepted into Infor's prestigious Micro-vertical Product Program. TimeLinx was designated as micro-vertical specialized specifically in Project and Field Service Management.

"We are very proud of the designation," said TimeLinx Executive Vice President and General Manager Jeffrey Gregorec. "It clearly defines our unique value proposition in the Infor ecosystem and marks the second milestone already in our 2019 growth strategy."

The first milestone came earlier this month with the company's launch of its Channel First program for channel partners.

"The timing couldn't have been better," Gregorec said. "Channel First provides Infor partners with an industry-unique solution backed by proven technology, rapid ROI for their clients, advantageous pricing and strong support."

As an Infor micro-vertical specialized company, TimeLinx has unprecedented access to Infor's global customer base through the company's partner network of more than 700 resellers, integrators and consultants.

Gregorec said "TimeLinx has already begun reaching out to Infor's partner network through webinars, social media, special training opportunities and informational materials.
