National Pi Day: Local Experimac to Offer Hands-On Raspberry Pi Programming Workshops

Affordable and Accessible Learning

HOUSTON, March 11, 2019 – Digital makers rejoice! In celebration of National Pi Day (3-14), Experimac West Houston and Experimac Pearland Parkway are launching a series of kid-focused programming workshops centered on the Raspberry Pi, a fully-functional computer that fits in your hand and opens your mind to a world of computing and programming possibilities. The workshops will be open to kids 8-15 years old.

The [Raspberry Pi](#) offers a wonderful opportunity for teaching children about computers and programming with accessible exercises for new and experienced digital makers. This workshop incorporates the innovation of 21st century STEAM education to better prepares students for higher education and skilled trades.

Workshop information – Space is limited to 8 participants per workshop
