## **RECON Names Jack Gilbraith President and Chief Executive Officer**

Houston, TX, April 24, 2019 – Remedial Construction Services, L.P. (RECON) announces that its Board of Managers has appointed Jack Gilbraith as President and Chief Executive Officer.

Mr. Gilbraith joins RECON with 30 years of industrial experience, including oversight and management of private and federal sector environmental, geotechnical and demolition projects and programs.

“We are very excited about the leadership and knowledge that Mr. Gilbraith brings to RECON,” said Steven Birdwell, RECON’s founder. “He has a solid background in the environmental remediation, demolition, and geotechnical construction industries and a proven record of execution and is someone we have known for years.”

In his role, Mr. Gilbraith will be responsible for all aspects of RECON’s quality-driven delivery of services as well as strategic growth in new business sectors. He will also provide business direction to extend RECON’s current service portfolio as we look towards the future of environmental remediation. Previously, Mr. Gilbraith served as President and CEO of Envirocon, Inc. for 10 years and he also served as the Vice President of Operations for 10 years for the company. He has a Bachelor of Arts in Geology from the University of Colorado and did further Graduate Studies in Hydrogeology and Chemical Fate and Transport at the University of California, Berkeley.

About RECON

Founded in 1989, Remedial Construction Services, L.P. (RECON) is an environmental remediation, geotechnical construction, industrial services and decommissioning & demolition (D&D) service contractor with the reputation for providing innovative solutions to complex environmental challenges. Our team of dedicated employees, financial strength, safety culture and a large fleet of equipment empower our company to deliver world-class solutions for the complex environmental problems our clients face. RECON provides custom solutions to clients in the energy/power, oil and gas, mining, waste management, manufacturing, consulting/engineering, chemical industries, and government entities. Our value-added services include stabilization and solidification, ash containment, decommissioning and demolition, groundwater containment, cap and cell construction, seismic stability, dewatering, surface impoundment water treatment, soil mixing, and deep soil mixing.
