Makers4Good Launches HELIO to Bring Light and Power to the World

The ultra-efficient solar lantern, flashlight, and power bank that provides the light you need, when you need it

Palo Alto, CA (July 2, 2019) — Today, [Makers4Good](#) introduces [HELIO](#), a philanthropic product devoted to providing the world with energy and light. Makers4Good created a solar light and power source that we can use for adventures, and that others in need would use every day.

Designed by experienced Silicon Valley product designers, HELIO is the world's most efficient and versatile solar lantern, flashlight, and powerbank. With HELIO's proprietary Chargeboost™ technology, users can charge anywhere, any time, even on cloudy days. The HELIO product is ideal for backpacking, boating, or any long period off the grid. HELIO provides the light you need, when you need it.

Simply charge HELIO during the day, and you can light up your campsite at night while charging your phone. HELIO is the lightest, most powerful, all-in-one solar light and charger on the market.

HELIO offers exclusive features perfect for sourcing and sharing light on-the-go. Customers are raving about the products. The strength of HELIO's torch and lamp, the ability to charge a cell phone and the overall design makes HELIO a fantastic light for any type of use. Early customers are already raving about the products. According to one reviewer, "We have used many different types of solar lanterns in developing countries over the last 5 years, and HELIO is by far the best and most durable."

HELIO is based on a simple idea: to design a solar light and power source to use for adventures and emergencies, and that others in need would use daily.

All profits from each purchase of HELIO will support nonprofit organizations. Makers4Good has identified select nonprofit partner organizations that provide solar light and energy through a variety of solutions to those in need.

"We have worked with each of our nonprofit partners over the last year to learn from their deep in-the-field experience about the needs of those living in regions without reliable energy access. Together, we will bring solar light and energy right where it is needed most," said Joe Cain, President, Makers4Good.

HELIO is a versatile and dependable power and light solution to help people all over the world. For more information or to request a product sample, please visit <https://helio.energy/>.

About

Makers4Good's goal is to make a difference, to give back, and to help those in need. Every product they design is focused on fulfilling a need and creating social good. Every product sold delivers 100% of its profits to charity.

Makers4Good (formerly known as Extrasensory Devices) was founded in 2011 in the heart of Silicon Valley. After launching several successful Kickstarter campaigns, the company was growing in terms of product sales, but wanted to do more to give back to the world at large. Inspired by the giving model of Newman's Own, Makers4Good.com has committed to giving away all of its profits to charitable causes through its nonprofit wing, Makers4Good.org.
