**Can't tell the difference between Pastanzo and regular pasta...**

July 25, 2019

**Verified Purchase**

This pasta is legit! Tastes like regular pasta but much healthier. My gluten-free daughter loves it and agrees that it tastes like any regular 'off the shelf' pasta product. I literally couldn't tell the difference between this and a regular shell pasta...great stuff!

This is by far the best chick pea pasta on the market. There is no grainy aftertaste and it holds its shape like standard pasta. I will definitely purchase this again.

I ordered the pasta just to see what it was all about as we are trying to eat healthier. So far we have made pasta salad and another dish that I can't remember the name. Lol. Both tasted great! The flavor of the pasta is great and mixes with other foods so well.

**Delicious!**

I've tried several pasta alternatives and this is by far THE BEST there is out there. The taste and texture will make you forget its made out of garbanzo beans - it's that good! This pasta pairs nicely with every sauce I've tried so far - pesto, marinara, or just plain olive oil and salt. I'll definitely be buying more and recommending this product to friends!
