[Press Release]: VoDaVi Technologies Celebrates 10 Years in Business

Business Technology Solution Provider Marks a Major Milestone

PLYMOUTH, MA --VoDaVi Technologies, LLC (VoDaVi), a leading Information Technology (IT) provider, headquartered in Plymouth, MA celebrates a decade of implementing cost efficient business class solutions that improve technology outcomes for their clients across New England. First and foremost, we would like to thank our clients, employees, business partners and the various communities we serve.

Chris Friel, Chief Operations Officer (COO) of VoDaVi said

"VoDaVi is an overnight success that was ten years in the making... It started with a simple idea of providing best in class services to organizations that valued IT and its impact. It then grew to wanting to create jobs for others who shared our passion and know that they could come to a place where it is all about making an impact. Now it's time to look forward and focus on new challenges that will be important to our customers and our employees. If you are one of our clients and business partners, thank you for your support and the integral role you played in our first ten years of success!"

VoDaVi initially began its life as a start-up operation out of the cofounders' home in 2009. The owners worked hard to serve their clients and build a solid business that allowed them to open their first office in Plymouth, MA in 2013. As they expanded, a second office was open in Stoneham, MA in 2016 to better serve its clients located north of Boston.

Since then, the company has doubled in size and is consistently growing the VoDaVi brand. VoDaVi has become the technology partner for many businesses and organizations throughout New England who rely heavily on technology to effectively and efficiently run their day-to-day business operations.

President, Amy Friel comments on the importance of community:

"Being an active member in the communities we serve and giving to those in need is something that has been a part of VoDaVi since we began our business. Each year we select and make charitable donations to different nonprofit organizations that we believe are vital to the community. This year I became a member of the Rotary Club of Plymouth, a local organization focused on "Service about Self. Being a Rotarian has opened up more opportunities for giving back and being more involved within our local community where we live and work."

VoDaVi specializes in all facets of technology to ensure that our clients have the guidance, coverage and support they need to meet their business technology challenges. Customers know that VoDaVi's Managed Services bring all of their IT support services and infrastructure management assets together in one place with one view.

Their "Always There" approach reinforces a pledge made by the founders to provide 24x7x365 Monitoring & Support at no extra cost which ensures their clients are back-stopped by the best support team which allows clients to focus on what's truly important - their business.
