

RExCam Kit

The RExCam Kit from RNK Products allows a provider to turn a high resolution, auto-focus camera into a high quality general purpose exam cam with ENT (ear, nose, throat) capabilities at an unprecedented price point.

The RExCam Kit includes software that allows for special zoom, brightness and focus control that optimizes use of hardware components (light ring and otoscope speculum). RExCam is available from MobilDrTech with a choice of two excellent HD webcams.

Kit Components

The components included in the RExCam Kit create a clinic quality, general purpose exam cam with ENT capabilities at an extremely attractive price.

- **Web Camera**
 - Logitech C-920 Webcam
- OR
- Microsoft LifeCam Studio Webcam

- **Light Ring** – Circular LED lighting for clear, crisp viewing of derm or throat

- **Otoscope Speculum** – For otoscope features to enable viewing into the ear canal or nostril

Configurations

Just slide the Light Ring/OTO onto your webcam and view on your PC with the RExCam Software platform.

Webcam, Adapter & Light Ring

Webcam, Adapter, Light Ring & OTO

Software Features

The RExCam Software platform is simple, yet powerful. It provides control of the focus, brightness and magnification of the webcam image for approved cameras and is available at no charge for the app.

Close-up Mode

RexCam Demo

View Size 640 x 480

Video Resolution 640x480 800x600 1024x768 1280x800

Cameras

- USB2.0 FHD Camera
- Close-up [MS Studio]
- Otoscope [MS Studio]
- Microsoft® LifeCam Studio

The magnification can be adjusted with a slide bar. Auto-focus or manual focus can be selected. For manual focus a slide bar enables control of the focal length. If needed, brightness can be adjusted with a slide bar. Typically, auto-focus and the default setting for brightness are used.

Otoscope Mode

RExCam Demo

RexCam Microsoft® LifeCam Studio(TM) (045e:0811)

View Size  640 x 480

Video Resolution **640x480** 800x600 1024x768 1280x800

Cameras
USB2.0 FHD Camera
Close-up [MS Studio]
Otoscope [MS Studio]
Microsoft® LifeCam Studio

Camera properties for Microsoft® LifeCam Studio(TM)	
Zoom	 317
Focus	 22
Manual Focus	<input checked="" type="checkbox"/>
Brightness	 101

The magnification can be adjusted with a slide bar. Auto-focus or manual focus can be selected. For manual focus a slide bar enables limited control of the focal length. Brightness can be adjusted with a slide bar for optimal viewing in an ear canal.
