Viruses and Bacteria are no match for high Power UVC Disinfection

XtraLight Manufacturing releases two UVC products to combat coronavirus and other pathogens

Houston, Texas: XtraLight Manufacturing, LTD today announced the introduction of their UVC disinfection line of products. **The UV-C High Power Ultraviolet Disinfection System** has shown to be effective in inactivating microorganisms. For years, ultraviolet wavelengths have been demonstrated to be effective in a variety of skin treatments, disinfection applications, and other processes. UVC which is the shortest of the UV rays, has been shown to be germicidal and effective in stopping viruses from reproducing. Research shows UVC to be effective on some of the most concerning viruses like SARS and MERS. Consumers and business owners can now rest easy knowing that there is solution to combat the spread of harmful microorganisms.

“UVC disinfection will change the way people feel about community space, providing peace of mind over pathogens. Now the UV-C High Power Disinfection System makes eradication of harmful microorganism quick and simple”, Says Kim Ward, Chief Operating Officer at XtraLight Manufacturing.

Features and benefits of the **UV-C High Power Ultraviolet Disinfection System** include:

- Unlimited application possibilities
- 245 nm on the Electromagnetic Spectrum
- Made in the USA, Manufactured in Houston, Texas
- Qualifies for Buy American and BAA
- Two distinct models: Handheld and Mobile (Designed to accommodate large spaces)
