

DOWN to EARTH Film - [Trailer](#)

“To live better, it starts with everyone on this planet”. The wisdom of the Earth Keepers in the film helps ignite positive change through everyday action.

This online release will make the film available on www.downtoearthfilm.com where it can reach more hearts and minds, reminding us all of the ancient wisdom.

An award-winning film taking you on a journey to visit the Earth Keepers, native wisdom teachers from around the world who hold the keys to a better future. Learn how to reconnect with yourself and your planet. A mind-opening, life-affirming journey from the comfort of your home.

The Earth Keepers foretold that the chaos in the world today is a sign that we are on the verge of a global transformation, moving into a new era of peace and balance with ourselves, with each other and with planet earth. This is our time to rise, collectively, people of all colours and all backgrounds coming together to create a change.

DOWN to EARTH is a film that follows a family breaking away from society to find a new perspective on life. For five years, travelling six continents, the parents and their 3 children aged 10, 7 and 6 go on a journey of discovery to capture the wisdom of the ‘Earth Keepers’. They find indigenous communities who have retained a natural balance and live in harmony with their surroundings, far removed from the technologically focused cultures of today. There is no crew, no production team, just one backpack and camera each. The film has left a heart imprint on the **250,000** people who have seen it in cinemas so far; it has become a movement, worked with in hundreds of educational institutions, corporates and community organisations. **More than a film**

DOWN to EARTH helps us become aware of our own personal relevance and generate people-powered change from the ground up: unlocking the potential of the common

people and reiterating that real change starts with us, by adapting our lifestyle and behaviours.

DOWN to EARTH is a mirror to humanity, a poignant and timely reflection on our civilised world. The movie invites us to see the world through the eyes of the Keepers of the Earth. It takes us on an inner journey, connecting us with the source and the mutual path we are walking. DOWN to EARTH is both a wakeup call and a resurgence of hope for our world to come. It is not just the launch of a film. It's the launch of a thought, a vision for the future.

The film's score is written by **BAFTA & Oscar** winning composer **Stephen Warbeck**.
