FOR IMMEDIATE RELEASE

Axiomtek Announces its 2021 Plan Will Include Increased Focus on Medical OEM/ODM Solutions and Customization Services to Serve the Rise in Demand for Medical and Laboratory Equipment

City of Industry, Calif. – December 8, 2020 – Axiomtek, a leading designer and manufacturer of innovative, high performance and reliable industrial computer products, is pleased to announce its 2021 vision and strategic plan for the medical industry. In its 31st year in business, Axiomtek will strengthen its long standing commitment in serving medical equipment manufacturers and increase its investment in technologies and experienced personnel to support the industry.

Axiomtek envisions the needs for better embedded computer technologies for medical device integration and for more efficient medical manufacturing technologies to continue to rise. Top-level personnel and R&D resources have been allocated to support customization services of current and new medical equipment maker customers. In 2021, Axiomtek will offer our medical customers more synergy from partner collaboration, additional resources for innovation, and enhanced engineering and account support.

To position itself for future success, Axiomtek has founded Intelligent Medical Solutions (IMS), a division under the Intelligent Design-in Service (IDS) Business Group, implemented key strategic product and service additions, and hired experienced personnel to support its growth. Axiomtek product lines include certified medical touch panel PCs, medical box PCs, high performance medical computers, edge AI servers, embedded systems and motherboards for medical and laboratory equipment integration. Its medical solutions have expanded in 2020 to include a standard temperature detection kiosk and customized health facility check-in kiosk. New and highly experienced staff have been hired to undertake continuous innovation for these product lines and to offer expertise in support of customer projects. In terms of services, engineering and customization assistance have been at the core of the company's competitive advantage and its key differentiation in the medical sector.

"We have a clear vision and a great strategic plan to grow in the medical sector in 2021 and beyond," said Chiven Fan, Axiomtek head of the IDS Business Group. "Axiomtek will continue to raise the bar in the embedded industry with smart medical solutions that are supported by the latest technology and developed with our customers in mind. We will continue to expand and shape our custom engineering services to ensure complete and best-in-class project support. Our teams are experienced and believe in going above and beyond to get the job done right. We are well-positioned to support any project, regardless of size or complexity, knowing that our customers appreciate the flexibility and configurability of our solutions as well as our exceptional engineering services."
