

LINEAR FIXTURES

MICRO 5 SERIES

Illuminating innovation with the power of MICRO light

Linear LED Fixtures

Introducing the MICRO 5 Series, Q-Tran's smallest line of linear fixtures. ATOM, ALTA, TILT, and SLITE are masterfully designed and engineered after some of our most popular fixtures, TORQ, TALO, VEVE, and MDIN. At approximately $\frac{1}{3}$ the size of our standard products, these fixtures deliver the same lumen output at the same wattage, making them ideal for a variety of applications for when space is limited, but superior light is needed. Available in satin or black finishes, with frosted or diffused lenses, or encapsulated in clear or translucent.

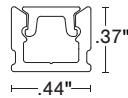

- o Satin and black finishes
- o Static White: 2000K – 4000K
- o RGB
- o UL Listed: dry (IP20), damp (IP54), wet (IP67)
- o Bare wire or barrel connectors available
- o End or bottom fed on select options
- o Photometric files available
- o Manufactured in the USA
- o 5 year warranty

ATOM

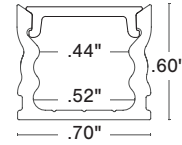

60% Smaller than the TORQ
 Fixtures available in satin or black
 Available with frosted or diffused lens
 Encapsulation with clear or translucent finish
 Available with stainless steel mounting clips
 Custom lengths up to 98.43"
