**TAYSHA GENE THERAPIES ADDS POPULAR E-LEARNING MEMBERSHIP PROGRAM  
“THE LAB RASCALS EXPERIENCE” BY K-5 EDTECH COMPANY CLUB LAB RASCALS TO  
EMPLOYEE BENEFITS PACKAGE**

Club Lab Rascals, the nation’s #1 producer of culturally-inclusive K-5 STEM curricula, on-demand STEM camps, and e-learning experiences has partnered with Taysha Gene Therapies. Taysha is a biotech and patient-centric gene therapy company based in Dallas, TX. Taysha has elected Club Lab Rascals’ popular e-learning membership “The Lab Rascals Experience” to be offered as an employee benefit.

In addition to supporting Corporate America’s call for more family-centered employee benefit offerings, this partnership works in tandem with Club Lab Rascals' focus on diversifying the STEM career pipeline so that more children can get excited about mastering advanced STEM skills earlier on in life.

[The Lab Rascals Experience](#) is a virtual and on-demand e-learning membership housed inside of a secure digital learning platform. On a monthly basis, young learners receive a series of lab lessons centered around a STEM-themes such as Outerspace, Genetics, Agriculture and Meteorology, to name a few.

Taysha Gene Therapies is a biotech and patient-centric gene therapy company that aims to develop and commercialize AAV-based gene therapies for the treatment of monogenic diseases of the central nervous system.

Through the partnership, Taysha is able to provide employees with opportunities to build up the next generation of STEM professionals, starting at home. This aligns with the company’s trailblazing mindset that is also reflected in its distinctive partnership with University of Texas Southwestern, and its faculty who have earned some of the most prestigious honors in science. Faculty include members of the National Academy of Scientists, National Academy of Medicine, Howard Hughes Medical Investigators, and Nobel Prize winners.

Club Lab Rascals’ pay-it-forward model sets “The Lab Rascals Experience ” apart from competitors. The “pay-it-forward” program encourages companies to donate memberships to charitable organizations. In Taysha’s case, the gene therapies company elected to donate more than 5-dozen additional memberships to Global Genes, a global non-profit advocacy organization for individuals and families fighting rare and genetic diseases.

-End-

Founded in 2019, Club Lab Rascals is the nation's #1 producer of culturally-inclusive, on-demand STEM camps and e-learning experiences. They are an innovator in the EdTech industry, constantly developing distinctive products and curricula that get kids excited about learning, and measurably diversify the STEM field.
