

Press release

The Power of Partnership: TPT Hub selected as Supporter of the Special Olympics World Games Berlin 2023 and National Games 2022

DUBAI, UAE – THURSDAY 31 MARCH 2022

Special Olympics World Games Berlin 2023 has selected [TPT Hub](#), in partnership with [Wiz-Team](#) and [Iventis](#), as the Supporter of the Special Olympics World Games Berlin 2023 providing digital solutions for Arrivals & Departures, Transportation, Accommodation and Awards Scheduling. This project is an exciting opportunity for TPT Hub and its partners to maximise the precision possible when bringing together three highly experienced providers under one integrated solution.

The Special Olympics World Games are the largest sports and social inclusion event on the planet—advancing a world of full inclusion for people with intellectual disabilities in sports, education, health and leadership. The Special Olympics World Games Berlin 2023 will feature 7,000 international athletes from over 170 nations across 26 summer sports and 2 demonstration sports. This is the first time Berlin, Germany, will host this captivating and inspiring event which celebrates the transformative power of sport in communities around the world. Though the main event will take place from 17 to 25 June 2023, Berlin will also hold the National Games this summer as a test event.

TPT Hub, Wiz-Team, and Iventis will provide a highly innovative and fully integrated set of tools that will help manage and deliver the logistical journey of thousands of participants at the World Games from touch-down to take-off. How will we make this happen?

- TPT Hub's [Fleet Management System](#) and [EntryHub](#) app will support time- saving on-demand transportation services throughout the Games ecosystem; and
- Wiz-Team's [Event-Works](#) will take the lead in managing the data collection and sharing of accommodations, arrivals and departures, and API integrations;
- Iventis will oversee the careful planning and implementation of awards ceremony schedules.

From our headquarters in Dubai, UAE, **Konstantin Voronov, CEO of TPT Hub** said: “TPT Hub is proud to be a Supporting Sponsor of the 2023 Special Olympics World Games Berlin. Our collaboration with both Wiz-Team and Iventis will allow us to demonstrate how, through combined IT synergies, we will usher in a new era in event planning and operations.”

Wiz-Team CEO Johann Woringer added: “This is yet another brilliant example of the value of partnership and how the close collaboration of specialists in different areas of event management can truly challenge the status quo and reveal new insights into optimising event delivery.”

Iventis CEO & Founder, Joe Cusdin, said: “Special Olympics World Games Berlin 2023 are championing an innovative approach to their technology solutions which we’re thrilled to be a part of. Working in partnership with dynamic companies like Wiz-Team and TPT Hub allows us to improve event delivery on multiple levels and creates new opportunities for meaningful integration.”

Beyond the technical solution, TPT Hub and its solution partners brings to Special Olympics World Games Berlin 2023 a team of event specialists who has served in over 100 functional roles at just about every major multi-sport event, including the last editions of the Olympic Games, Youth Olympic Games, Pan American Games, Asian Games, World Beach Games, Expo 2020 Dubai, Commonwealth Games, and the Special Olympics World Games.

Stay tuned for updates on this story and more as we continue to push the envelope in event delivery through both innovations in technology and partnerships!

About TPT Hub

TPT Hub is a Dubai-based IT solutions company that focuses on improving transportation and fleet management planning/operations. Our management team has managed event operations for some of the world's largest sporting events and our software reflects this experience.

Our Transport Control Software includes Fleet Management, VAPP (Parking Permit) Management, Arrivals & Departures System, QR Code Services, and Vehicle Tracking Solutions. Our system-based EntryHub app provides our clients with capabilities in a ride share system, automated T1/T2/T3 system dispatch, Arrivals & Departures ground staff support, and a QR Code reader solution all within an integrated communications system.

“It all begins and ends with transportation.” is our belief. We pride ourselves in developing software that is designed by event professionals for event professions. Our systems have brought efficiencies to transport operations for clients such as Match Hospitality (2018 FIFA World Cup Russia), Expo 2020 Dubai Fleet & Transport operations and the Canadian Olympic Committee (2022 Olympic Winter Games) and now the 2023 Special Olympics World Games-Berlin.
