## St. Mary's in Boise Has New On-Campus Soccer Field

**BOISE, Idaho:** St. Mary's Catholic School now has a 50' x 80' soccer field on campus for students. Urban Soccer Park's project was completed in April 2022 as part of the Westside Grounds Project, which focused on providing a new amenity on the property that did not have green space.

Students now have a field for recess, training, sports, and the ability to do it all on campus. The field has been over-turfed so they can use the surrounding areas to warm-up and play other sports. The field includes futsal goals, lights, two doors, and surrounding netting. With the addition of this field, the school will be able to provide the space to help in their mission to build character, welcome the community, and cater to each individual to help them reach their fullest potential.

The St Mary's Catholic School project was planned in order to help the school provide a multi-functional, safe place to play on school grounds. The campus was thus far without green space, so the school's primary goal was to provide students with something other than concrete to play on during school activities. Another key mission is to welcome the community, which they will be able to provide for events and other groups to use.

Urban Soccer Park helped St. Mary's Catholic School accomplish three goals:

1. To upgrade their schools grounds for their kids to use for recess and activities
2. Use the field as a revenue generator for the school
3. Use as a new multi-functional amenity

**About Urban Soccer Park:** At Urban Soccer Park, less is more. Mini-pitches grow the sport, create life-long enjoyment of the game, and develop world-class skills. Everyone at USP is a coach, an athlete, or a parent. Throughout our decades of experience, we've traveled the world and witnessed the undeniable proof that small-sided soccer is that secret sauce—it creates brilliant players and great footballing nations. And the beauty is that they actually require less real estate, less overhead, and less set-up time, yet provide more touches on the ball, more playing time and a deeper understanding of game concepts.
