Build Core Competitiveness, Keep Innovating and Developing

AVCiT Technology mainly focuses on developing Audio Video processing technology for display control and KVM solution, specially AV over IP solutions. We developed ASE computing screen coding technology based on H.265, which realizes to transmit 4K@60 4:4:4 video streaming over low bandwidth in nearly original image quality and low latency, it has been applied in the amount of large-scale government projects.

During 2019 to 2021, AVCiT Technology invested more than 10% of turnover on the R&D, continuously investment and stable R&D team are backbone of advanced products and extremely good service.

AVCiT provides Integrated IP Based KVM & Video Wall Control solutions and Distributed & Fiber KVM Matrix system for command control room, with revolutionary technologies such as Intuitive Video Wall Processing over IP & Dynamic KVM over IP, which greatly add more value on the control room design.

The solutions have been widely deployed in Control Rooms, Network Operation Center (NOC), Security Operation Center (SOC), Emergency Operation Center (EOC), Joint Operation Center(JOC), Airport Operation Center(AOC), Traffic Operation Center(TOC), Board Room and Meeting Room, etc in different industries, including Government, Public Security, Finance, Telecomm, Energy & Utility, Oil & Gas, Transportation, Aviation, Military & Defense, Armed Force, Smart City, Broadcasting, Sea Port, Offshore and Enterprise ,etc.

Our accumulated and combined expertise in control room, allows us to innovate and add more value to meet the diverse and growing needs of clients from different industries, including:

- Leader of LED/LCD/DLP video wall control over IP technologies
- Pioneer to develop dynamic KVM over IP technologies
- Leading market share in the AV-over-IP control room field

- Own talent to full control R&D and Production, Marketing and Sell

"It is a new start and a new challenge for AVCiT Technology after being the listed, we will continue to develop more add-value solutions according to the user requirement and trend of AV over IP, Visualization, Collaboration and High-definition Video. We will contribute to play our ultimate innovation in the digital government, digital economy etc.", the CEO of AVCiT Technology said.
