UPCARPARTS RELEASES NEW 1962-1964 CHEVY NOVA SEQUENTIAL LED TAIL LIGHTS

Long Beach, CA., 10/31/2022 – United Pacific Industries’ subdivision UPcarparts.com, a premier classic car and truck parts manufacturer, is proud to announce the release of their 26 LED Sequential Tail Light for the 1962-1964 Chevy Nova, debuting exclusively at the SEMA Show in Las Vegas on November 1, 2022.

United Pacific has long been a leader in lighting for classic trucks and cars, and these tail lights are no exception. As UPI Marketing & Creative Director Jai Baek notes “first-generation Novas are highly sought after by collectors and enthusiasts, and we’ve had numerous requests for updated tail lights.”

As a result of the demand, UPcarparts created OEM-style sequential tail lights with 26 crisp LEDs, offering a substantial increase in safety compared to the Nova’s standard incandescent bulbs. The lights have been designed with fitment and quality in mind, ensuring a seamless install while honoring the aesthetics of the Nova’s vintage lines.

The features of these super bright red LEDs include:

- Sequential operation with selector switch to choose sequential left, sequential right, or sequential function off
- Brake attention option with sequence-once function
- High-quality injection molded polycarbonate lens
- Epoxy coated, fully sealed electronics
- Comes with the 1157 Plug Adapter that matches the car’s connection, and aids in ease of plug-and-play installation
- Requires LED compatible flasher for proper operation (UPcarparts item #s 90652 or 90649)

The lights are currently available to order on UPcarparts.com, MSRP: \$53.99/ea.

About United Pacific
