Sustainable Designs for Electrification and Decarbonization of Commercial and Industrial Buildings

UEP Northeast & Fulton to be Featured on Inside the Blueprint

[Blue Bell, PA, June 14] — UEP Northeast and Fulton Boiler are set to be featured on Inside the Blueprint, Local Edition. This episode highlights the latest innovations in green technology helping commercial buildings perform more sustainably and efficiently.

Tune In Saturday, June 17 at 12:30pm on WFMZ (Xfinity 792, Verizon 515) and Sunday June 18 at 11:00 Am on WPSG-CW (Xfinity 811, Verizon 516), Facebook Watch and YouTube.

This segment highlights UEP Northeast and Fulton's capabilities and newest technology offerings for commercial and industrial buildings pursuing electrification and decarbonization initiatives. Along with the latest in Hybrid, low and zero emission ultra-high efficiency boiler technologies for hot water and steam applications in healthcare, life science, biotechnology, process manufacturing, higher education, multi-family and hospitality

UEP Northeast is a manufacturer's representative firm in the commercial & industrial HVAC market sectors serving central & eastern PA, southern New Jersey and Delaware. UEP Northeast serves the mechanical & plumbing engineers, sheet metal & mechanical contractors as representatives of the highest quality manufacturers. Product offerings include hydronic & steam boilers, water heaters, pumps, heat exchangers, tanks, and venting products.

Fulton is an American multi-national collection of companies headquartered in Pulaski, New York, USA. We research, engineer, manufacture, and support premier heat transfer equipment for a wide range of commercial and industrial applications. Today Fulton employs more than 650 people in facilities across five countries, serving as an industry leader of emerging heat technologies for more than 70 years.

About Inside the Blueprint

Inside the Blueprint is a fast-paced series chronicling ideas, solutions and products that impact how we live, work and play.

The show takes a sweeping look at innovations in healthcare, industry 4.0, commercial construction, sustainability, supply chain, transportation, technology, and the net zero carbon future. Airing on national business channels and syndicated locally around the USA. Inside the blueprint was developed by the creative minds at Brandstar, headquartered in Deerfield Beach, FL. Inside The Blueprint, now in its 8th season, is produced by Brandstar, a national media company and digital agency with its headquarters and production studios in south Florida.

For more assistance with a Sustainable, electrification, decarbonization, or any other Hot Water, Steam, Domestic or Flue & Venting Design visit our website at www.UEPNortheast.com or contact Joe Palmeri, Vice President, UEP Northeast at joe@UEPNortheast.com.
