

# Providing Traction on the Toughest of Terrains

# Helping You Improve Safety and Productivity

## The TrackGrip Range

Our customers work their sites hard. Projects are challenging and schedules are tight. To make jobs safer and easier TrackGrip offers a range of quality, durable excavator and tracked vehicle attachments to increase traction on the toughest of terrains from icy slopes to dense mud.

Designed with exceptional sideways protection to prevent sliding, it means less downtime and increased efficiency. You can stay safe and enjoy improved productivity all year round.

The TrackGrip range consists of five unique products designed to fit all makes and models of tracked vehicles:

---

**MIGHTYGRIP** (Patented)

---

**ICEGRIP** (Patented)

---

**RUBBERGRIP** (Patent pending)

---

**CHAINGRIP** (Patent pending)

---

**DOZERGRIP** (Patented)

---

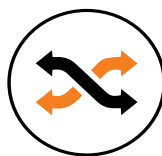

## Why Choose TrackGrip

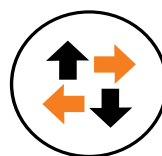

**TRACTION**

**SAFETY**

**STABILITY**

**VERSATILITY**

**DURABLE**

**EASY  
INSTALLATION**

TrackGrip are one of the most extensively researched, developed and tested range of track attachments available, supported by individual patents. Please see [www.trackgrip.com](http://www.trackgrip.com) for patent details. The range is supported by a manufacturer's warranty.

Each product fits a range of track configurations and vehicle weights providing customised solutions for all. With a simple bolt on option for operators to install and uninstall, it takes 15-20 minutes – no drilling or welding required. Manufactured in the USA and New Zealand from the hardest high-tensile steel on the market ensures the unique adjustable design is highly durable, able to withstand any site condition.

*Product may differ from photos featured in this brochure.*

# MIGHTYGRIP

## DESIGNED FOR – STEEL TRACKS

Additional wear plates and gusseting add strength for use in the most punishing environments

### BENEFITS

- + Improves safety, traction and stability
- + Patented sideways protection - prevents sideways sliding
- + Install a full set in 30 minutes
- + Easy removal when changing terrain

### CONDITIONS

MUD

SNOW

CLAY

STONE

**PATENTS:** AU2011213365B2 / CA2969770C / CA2789136C / NZ602283B2 / NZ700669B2 / US9862436B2

**ICEGRIP**

**DESIGNED FOR – STEEL TRACKS**

Manufactured from high-tensile steel for extreme durability

**BENEFITS**

- + Improves safety, traction and stability in any condition
- + Patented sideways protection - prevents sideways sliding
- + Functional at minus 15 degrees Farenheit / minus 25 degrees Celsius
- + Install a full set in 30 minutes
- + Easy removal when changing terrain

**CONDITIONS**

**ICE**

**PERMAFROST**

**ROCK  
& SHALE**

**COMPACT  
SNOW**

**PATENTS:** CA3009647A1 / EP3393894B1 / NZ744143A1 / US11390341B2

# **RUBBERGRIP**

DESIGNED FOR – RUBBER TRACKS

## BENEFITS

- + Extend the lifetime of your rubber tracks
- + Improves safety, traction and stability
- + Assists with sideways protection
- + Install a full set in 30 minutes
- + Easy removal when changing terrain

## CONDITIONS

ICE

SNOW

MUD

FORESTRY  
& BUSH

**PATENTS:** CA3120069A1 / EP3883843A1 / NZ776001A1 / US20220017164A1

# CHAINGRIP

DESIGNED FOR – STEEL & RUBBER TRACKS

Multifit across 95% of track width

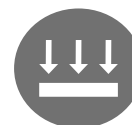

## BENEFITS

- + Improves safety, traction and stability in any condition
- + Assists with sideways protection
- + Ideal for terrains requiring less aggressive traction
- + Multiple uses
- + Install a full set in 30 minutes
- + Easy removal when changing terrain

## CONDITIONS

INCLINES

**PATENTS:** CA3009647A1 / EP3393894B1 / NZ744143A1 / US11390341B2

# DOZER GRIP

DESIGNED FOR – STEEL TRACKS

## BENEFITS

- + Improves safety, traction and stability
- + Enhanced performance in Mining conditions
- + Increases ground pressure distribution
- + Assists in sideways protection
- + Easy removal when changing terrain

## CONDITIONS

ICE

ROCK

MUD

MINING
