

Extreme Handyman Service Launches EV Charging Station Installation Services to Power Seattle's Electric Future

Seattle-based home services provider Extreme Handyman Service introduces expert electric vehicle (EV) charging installation, helping homeowners and businesses transition to a cleaner, more connected future.

Seattle, WA — With the rise of electric vehicles (EVs) transforming the way people travel, **Extreme Handyman Service**, a trusted name in Seattle home improvement, proudly announces the launch of its **EV charging station installation services**. This new offering supports the region's push toward clean transportation by providing local, reliable, and professional EV charger setup for both homes and businesses.

Extreme Handyman brings decades of hands-on expertise to the growing demand for EV infrastructure, ensuring seamless, code-compliant installations across King County.

"Electric vehicles are the future of transportation—and Seattle is already leading the charge," said Extreme Handyman Service. "We're here to make sure our community has the right infrastructure in place, whether that means installing a charger in a homeowner's garage or outfitting a commercial lot for multiple vehicles."

Services Now Offered Include:

- Level 2 EV Charger Installation for Homes
- Commercial EV Charging Station Setup
- Electrical Panel Assessments and Upgrades
- Smart Charging Integration (Wi-Fi / Bluetooth Enabled)
- Permit Processing and Code Compliance

Seattle's shift to electrified mobility aligns with statewide initiatives to reduce carbon emissions and phase out gas-powered vehicle sales by 2035. Extreme Handyman Service's new EV services empower local residents and businesses to support that vision—offering a turnkey solution that includes equipment guidance, licensed electrical work, and system optimization.

Whether serving a homeowner in Ballard, a business in Bellevue, or a multifamily property in Capitol Hill, Extreme Handyman delivers top-quality service backed by a commitment to safety, efficiency, and long-term reliability.
