

THE MAVERICKS – LIVE IN TEXAS (2017)

Recorded on a warm Texas night in 2017 at Whitewater Amphitheater, *Live in Texas* captures The Mavericks in full command—wind in the lights, the crowd pressed close, and Raul Malo guiding his band through a set that moves from heartbreak to celebration without ever losing its fire.

This performance is preserved exactly as it happened: no fades, no smoothing, no studio polish. Every transition, every breath, every word from Raul between songs remains intact. The night unfolds in real time across 21 tracks, including a brief encore moment that carries the electricity of the band stepping back onstage.

Today, **DB Media Entertainment** and its podcast arm, **Green Chili Chisme**, bring this recording forward as a cornerstone of our **Legacy Foundation**, honoring the musicians and storytellers who have touched our world and shaped our cultural landscape. This album stands not only as a document of a remarkable night, but as part of a larger mission to preserve the voices and performances that deserve to be remembered.

Live in Texas is presented with gratitude to the band, the fans, and the moment itself—an archival release dedicated to the spirit of The Mavericks and the legacy they continue to inspire.
