

What is in here

Everything needed to write about AI Promo Design or put our mark next to something: the logo in every form anyone asks for, one illustration of what the product does and one screenshot of it doing it, and boilerplate you can paste without rewriting.

Last updated: October 1, 2026.

There is no request form and nothing to ask permission for. Every file below is a public URL on this domain and stays at that URL, so a link works as well as an attachment.

Download the media kit (ZIP)

5.4MB, 58 files - every logo, the press image and the screenshot

<https://aipromodesign.com/brand/aipromodesign-media-kit.zip>

The individual links are below if you would rather take one thing. The PDF and the web page are built from the same source, so they say the same thing; the web page is the one that stays current.

The press image

One 16:9 illustration of what the product does: the sentence someone typed, the print-ready file it produced, and that file on a shirt.

- 2400×1350 PNG - the master, 1.1MB. Use this unless something refuses it.
- 1200×675 PNG - 384KB, for the web.
- 2400×1350 JPG - 196KB, for a CMS that will not take a PNG.

Caption, if one is wanted: *AI Promo Design turns a typed sentence into a print-ready file and puts it on the garment.*

It is a rendering rather than a screenshot, and everything in it is the real thing: the same lockup file linked below, the same starter sentence the site offers, the same generated artwork and the same printed garment shot.

The designer, as it is

The press image is a rendering. This is a screenshot: the designer on the live code, after the example sentence the site offers was typed into the chat, with the design Remi made from it on the garment it asked for.

- 2880×2128 PNG - the master, 1.1MB. Use this unless something refuses it.
- 1200×887 PNG - 376KB, for the web.
- 2880×2128 JPG - 382KB, for a CMS that will not take a PNG.

Nothing in it was edited or retouched: the design is what that one sentence produced, with no changes asked for, and the product, prices and colors are the live catalog's.

Boilerplate

Paste any of these verbatim. They are written to be copied, not paraphrased.

One line. AI Promo Design is an AI chat that turns a typed sentence into a print-ready design, shows it on the garment, and takes the order.

Short. AI Promo Design is a US custom apparel company built around a chat. Describe what you want printed, watch it appear on the actual garment, then pick colors and sizes and check out in the same conversation. No design software, no quote form, no minimum order.

Long. AI Promo Design is a United States custom apparel and promotional products company built around a single conversation. A customer describes a design in plain English, sees it rendered on the garment within seconds, and adjusts it by asking rather than by editing - bigger, move it up, try it in white. Colors, sizes and checkout happen in the same chat. There is no design software to learn, no quote form and no minimum order: one piece costs the same per piece as two hundred. Orders are printed and shipped in the US. Founded by Oz Barhama and operated by Kinor LLC, AI Promo Design launched on October 1, 2026.

Writing the name

AI Promo Design. Three words, capital A, capital I, capital P, capital D, with a space between Promo and Design, and no hyphen anywhere.

It is not the glued no-space form (PromoDesign stuck after Promo), AIPromoDesign, AI hyphen Promo Design, the hyphenated repo-style form, or aipromodesign. Set in running text it takes no special styling: the wordmark's holographic "AI" and the star over the "I" belong to the logo, not to the name.

On second mention, "AI Promo Design" again. There is no accepted short form, and we would rather be named in full than abbreviated into something that has to be explained.

Remi

Remi is the assistant a customer talks to, and she is the whole interface. There is no separate design tool behind her: the artwork, the garment, the colors, the sizes and the order all happen in the sentences somebody types at her.

Avatar, 256×256 JPG

Remi is software, and the avatar is a generated image rather than a photograph of anybody. Caption her as AI Promo Design's assistant and no reader is misled; caption her as a spokesperson,

a founder or an employee and one is. She is a name over a door, not a person to quote. A quote from the company comes from a human at the company: Oz Barhama, the founder.

The facts

Everything in this table is read off the live catalog and the live code rather than off a slide, so it is checkable against the site.

Status	Launched October 1, 2026
Founder	Oz Barhama
Operated by	Kinor LLC, Agoura Hills, California, United States
Site	aipromodesign.com
What we print on	14 products: 8 apparel styles, a printed cap, a ceramic mug, a steel tumbler, a canvas tote and two notebooks
Apparel	Adult and youth tees, adult and youth hoodies, adult and youth crewnecks, a polo and a long sleeve. Gildan blanks throughout, except the JERZEES pique polo. The cap is AS Colour and the tote Liberty Bags.
Sizes	Youth XS through adult 2XL. One price per garment whatever the size.
Prices	Apparel \$19.99 to \$38.99; the mug starts at \$12.99. One printed surface is included in that. Each surface after it adds \$8.99, or \$9.99 on the youth tee, youth hoodie and polo, and nothing on the notebooks, mug or tumbler.
Minimum order	None. Mixed sizes and mixed products ship as one order.
Colors	Eight on apparel: Navy, Red, Royal, Black, White, Sport Gray, Forest Green, Gold. Which of them a given garment carries depends on the blank, and the designer only offers combinations we can actually print. The cap has a range of its own, the tote comes in Natural or Black, and the mug and notebooks are white.
Cost to design	Free. Ten designs a month without an account, then thirty a day and a hundred and fifty a month with a free one. Nothing is charged before checkout.
Production	Printed and shipped in the United States. Up to 10 business days in production, plus shipping.
Press contact	remi@aipromodesign.com

We do not publish customer counts, order volumes or traffic figures, and we would rather be quoted saying nothing than be quoted saying a number nobody can check.

Questions we get

Who owns a design? The customer. Artwork they upload and designs they create stay theirs, and they can use them in their own marketing without paying us or crediting us. The terms also say plainly that a design made by a machine may not be protected by copyright in the United States, so we do not promise anybody an exclusive right in one.

Can someone print another brand's logo, or a cartoon character? Only if it is theirs to use. The terms require the rights to every logo, team mark, name, character and photo in a design, customers confirm that when they check out, and an order that appears to infringe can be canceled and refunded, before or after payment.

What makes the artwork? Google's Gemini. The privacy policy names it, because what a customer describes is sent to it to be turned into a design.

Where do you ship? Anywhere in the United States, free, on every order. Not internationally yet.

Logos

"Light" and "dark" name the background, not the artwork. The light files are dark ink for a light ground; the dark files are white and pale teal for a dark ground. Pick by what is behind the mark.

Prefer the SVG. Every glyph in it is outlined, so it needs no fonts installed and scales to a billboard.

	Coin, on its own	SVG · 1024 PNG · favicon.ico
	Wordmark	light · dark · mono black · mono white · mono teal
	Lockup, coin beside the wordmark	light SVG · dark SVG · light PNG · dark PNG
	Lockup with the tagline	light SVG · dark SVG
	Stacked, coin above the wordmark	light SVG · dark SVG
	Stacked with the tagline	light SVG · dark SVG

Every preview above is the light file, because a thumbnail has to sit on something. The dark file is the same artwork redrawn in white and pale teal for a dark ground, and here is the pair side by side:

	
---	--

The tagline files carry "Unleash Your Creativity" under the letters. Use one where the logo has room to say something; use the plain pair in a header or a byline.

Every PNG comes in a 1200px web copy as well as the master: add -1200w before the extension. The coin ships at 1024, 512, 256, 192, 128, 64, 48, 32 and 16.

Colors and type

brand teal	 #0C7488	ink	 #101E22
brand deep	 #0A5C6B	cream	 #F5EBD7
brand light	 #7BD0DC	ground dark	 #0D1A1E
accent brass	 #C99A3A	brass on dark	 #DDB35C

Wordmark: Zilla Slab 700. Headings: Playfair Display. Body: Inter. All three are free and open-licensed, so a layout that has to match ours can install them.

Using the mark

- Use the files as they are. Do not recolor them, rotate them, stretch them, outline them or drop a shadow behind them.
 - Do not rebuild the wordmark by typing it. The spacing and the star over the "l" are part of the artwork.
 - Do not crowd it. Give it room from other logos, type and the edge of whatever it sits on.
 - Do not use the mark in a way that suggests we endorse, sponsor or are partnered with something when we are not.
 - The mark is ours. Editorial and journalistic use needs no permission; anything else, ask first.
-

Contact

remi@aipromodesign.com is the press address, and a question sent there is read as one rather than queued behind order enquiries. Tell us your deadline in the first line and we will answer against it or say we cannot. For anything about an order, service@aipromodesign.com is the faster route.

If you need something that is not here - a different crop, a higher resolution, a quote from Oz Barhama on a specific point - ask rather than making do. That is what the address is for.
