Mascon Computer Services is a premier Indian provider of electronic data conversion services, offering 24 x 7 infrastructure and resources that help you cut costs and post significant turnaround time.

Mascon offers services in Document Conversion and Data Processing.-

Mascon has a great deal of experience in successfully completing international and domestic data conversion projects. We are very comfortable with massive amounts of data and offer conversion to the following formats: DjVu, TIF, DOC, high quality PDF and delimited text.

More about Mascon
Mascon has a number of massive data creation and repurposing projects to its credit, for both domestic and international clients. Over the years, we have captured millions of data and documents to various formats, with zero quality rejection.

Our accuracy is 99.998% (1 character mismatch out of 50000 characters).

We have 300 people and can upscale rapidly if need be. All projects follow strictly documented production procedures with stringent internal quality control.

Mascon is an ISO 9001:2000 certified company.

Brief Services List

High Volume Document Scanning
These services are suitable for scanning of large volume paper documents and converting them into legally permissible Image Format like TIF/PDF.

EBook Publishing Services
These services are useful to Publishers, Libraries and Distribution channels, including Print on Demand publishers (high quality, small print run)

Imaging Services - DjVu Conversion
Services suitable for storing documents in highly compressed images (Without Searchable and Editable Text features) for distribution on the Internet / Intranets.

Imaging Services - Acrobat PDF Conversion
These are standard global document storage formats. Documents converted in this way have legal status, maintain trueness to original and are highly compressed in file size, suitable for distribution on the Internet / Intranets.

Forms Processing Services
These services are suitable for Banks and Financial Institutions, Insurance Companies, Hospitals, Educational Boards and Corporate Bodies where forms are in huge numbers and need to be accessed rapidly through the Internet / Intranet.

Word Processing Services
This involves the conversion of Old Proprietary Electronic Text Documents or Legacy Data Formats to Net Friendly Text Documents.

Data Format Conversion Services - Imaging, Indexing and Database
This service is suitable for conversion of huge volumes of data in paper/electronic format into a (delimited or formatted) text format for ready export into any database software.

Structured Tagging and Markup Services - Net Friendly Documents
This service is aimed towards providing cohesive structure to highly complicated unstructured data in various formats for easy and rapid access through the Internet / Intranet. Formats include HTML / XML / SGML.
