

Tools We Use

C² Build—an online, database-driven training content management system used to expedite the development of SCORM-conformant Web-based training.

C² Collaborate—a Web-based video conferencing and collaborative interaction toolset which allows learners in diverse locations to work together with interactive training exercises and simulations.

C² Learn—an elegant, scalable learning management system perfectly integrated with C2Build and SCORM/AICC standards that provides user-configurable and customizable interfaces to gain access to relevant content through a simple-to-use, friendly, template-based interface.

C² Writers World—a Web-based, collaborative document development and management system that allows multiple users at diverse locations to collaboratively create, edit, and finalize documents online using the Microsoft Word word-processing development environment.
