Systems Engineering

Connecting Business With Technology

Our Mission:

To help build and support a more powerful business community through technology by providing innovative solutions, superior products, and expert network services.

Systems Engineering's experienced staff has provided comprehensive business solutions since 1987.

About Systems Engineering Extraordinary Expertise.

When you choose Systems Engineering as your technology partner, you're joining forces with experts who understand your business needs. We go to extraordinary lengths to protect your investment and increase productivity by minimizing disruption and keeping your network up and running at peak performance. That's our promise.

No wonder we're preferred by so many successful companies throughout Maine and New Hampshire. Industry leaders in finance, law, manufacturing, and other specialized fields — Alpha One, Jøtul, Macdonald Page Schatz Fletcher & Co., Maine Lubrication Services, Drummond Woodsum and MacMahon, Eyecare Medical Group, and dozens more — rely on Systems Engineering for technology that solves problems, eliminates inefficiencies, and enables best business practices.

Whatever your business goals, you can trust Systems Engineering to put technology to work for you when you connect your business to our complete range of technology expertise:

- Network Design & Installation
- 24/7 Network Monitoring
- LAN/WAN Support
- IP Telephony
- Network Security Audits
- Web Application Development
- ERP & CRM Solutions
- Custom Software Development

Consider us your premier source for high-end hardware, sophisticated software, and proven systems and components from industry leaders like Cisco, Compaq, SalesLogix, Microsoft, and more.

For technology that's extremely reliable, extraordinarily smart, and exactly right for you... *call Systems Engineering today.*
