

Dear Real Estate Professional

After months of development work, we are pleased to announce the commercial launch of BuildingSearch.com in California. Now you can access thousands of California commercial property listings online, and on demand. Quickly find what you are looking for by street address, property type, or by a dozen other useful search filters.

Why BuildingSearch.com?

Verified Transaction Ready Data

No real estate listing service is perfect, but we know you will be overwhelmed with the depth of data we are tracking on a constant basis. The listings shown are from every known landlord and or listing agent. Some commercial real estate portals are great for the "for sale" listings, and not so good for the "for lease" space options. You will find BuildingSearch.com strong in both categories.

Even if you already have access to good property data, you will find BuildingSearch.com to be a great second source and an inexpensive insurance policy against missing that critical listing.

Valuable Real Estate Applications on Demand

You will find everything you need on BuildingSearch.com to put together a comprehensive and yet customized report for you or your client. Time tested by real estate professionals, you can show the data you want and be out the door to conduct a highly professional tour in a matter of minutes, not days. Be sure to sign up for the automatic property update feature so that whatever your search parameters, you receive a constant flow of property information matching your current requirements.

Highly Cost Competitive

The cost to use BuildingSearch.com is the lowest in the industry. Our competitors charge far more for the same or inferior information. For as little as \$10.00 per day, you can't find a better bang-for-buck commercial real estate portal and vertical search engine. If you find yourself a more frequent user, sign up for the \$25.00/month program which is a real bargain when you compare the depth of our data against the competition.

Great Listing Visibility

Including your listings on BuildingSearch.com is a highly compelling business proposition – it is free! Thousands of commercial real estate searches occur on BuildingSearch.com each day and many transactions have directly resulted. For only \$45.00 per month, enjoy access to all the information and applications, and put your listing on top of every search by featuring your property. Featured properties are highly visible to all users of BuildingSearch.com with or without a subscription. Featured property customers include Cornish & Carey/Oncor, Colliers International, Peery/Arrillaga, South Bay Development, and hundreds of individual listing agents.

Our Service is Extremely Easy to Use

It's all web based. Simply point and click your way around the map to find exactly what you are looking for.

Testimonials

"The service is great. Everything required to make contact with listing agents, pricing, and property brochures is all on one screen."
Jeff Rogers, Senior Vice President, Colliers Advisory Group, Colliers International

"BuildingSearch.com is a fantastic source of information during the site selection process. My clients use it and it's a great collaborative tool to conduct tours online." *Jay Phillips, Senior Vice President, Client Solutions Group, Cornish & Carey*

"We feature our properties on BuildingSearch.com and I am pleased to see our properties included in so many search requests. I think these guys are doing a great job marketing our vacancies" *Jason Peery, Principal, Peery/Arrillaga*

If you are not yet a member, we hope that you visit and sign up for an account. If for some reason we are missing one of your listings, please send the information to listings@BuildingSearch.com and we will immediately post it. For continual listing updates, have your research department contact us and we will automate the entire process of keeping your listings out in front.
