Our special types of seaweed have been used for many health reasons in Asian and European diets for centuries. Scientists have identified important natural components in seaweed, such as Fucoxanthins, minerals, vitamins and complex polysaccharide. Preliminary lab evidence suggests Fucoxanthin has been shown to cause thermogenesis - Fat Burning and it may help with body detoxification.

FUCOSELEAN™ is a proprietary **MD FORMULATED** marine nutraceutical that may promote thermogenesis. It contains natural Fucoxanthin from brown marine vegetables concentrated at the clinically researched level. This unique marine vegetable extract is combined with special Green Tea extracts for sugar metabolism and **ANTIOXIDANT POWER®**, and it contains chromium for the support of insulin function.

FUCOSELEAN™ supports fat metabolism, including belly fat (white adipose tissue). **FUCOSELEAN™** can be taken any time of day because **FUCOSELEAN™** does not overstimulate and it will not cause jitters.
