An exchange for the better.™

## Florida Private Company Raises Money Through TIGRcubs™

**Chicago, IL – February 19, 2008** – AnnuityEASE.com, a data consolidator of annuity pricing information for professional financial advisors, successfully gained private investors attention with Entrex's TIGRcub™ product.

The proprietary instrument, a patent pending and trademarked name for "Top-line Income Generation Rights Contracts" (TIGRcub™), was developed by Entrex Inc. and launched in late 2007.

TIGRcub™ instruments address the inevitable illiquidity issues that exist in the world of private-sector investing. TIGRcubs™ were specifically designed to garner high current cash-on-cash returns from investments into private companies.

AnnuityEASE.com CEO, William Walsh, admits "TIGRcubs™ are a great solution for companies in my position. As a private company CEO I could now approach potential investors, who are inundated with illiquid equity-focused opportunities, and offer them the better way to get involved. Cash-on-cash and risk adjusted returns without needing to promise future liquidity for their equity stake – an event which would be ultimately market timing and market sentiment focused anyway."

"The TIGRcub™ structure allows me to play on my company's strength, which is growing revenue, while providing investors a regular, growing and ongoing cash return – something they don't often see."

In fact, Mr. Walsh identified multiple investors tempted by the AnnuityEASE TIGRcubs™. One capital source explains, "It's appealing to add something like a TIGRcub™ into my portfolio. The deal offers returns from the first month after I invest and, over the life of the contract, it has the potential to offer a compelling alternative investment type return."

Entrex launched TIGRcubs™ to capitalize on the revenue growth of private companies with annual revenues less than \$100 million, several years of operating history, demonstrated growth and sustainability. Entrex offers origination, reporting, rating and eventually trading of private company financial instruments.
