Satori Group, Inc. Finalist for the 2008 SoftwareCEO Software Innovation Awards

CONSHOHOCKEN, PA – April 16, 2008 - Satori Group, Inc., a premier provider of enterprise class virtual Business Performance Management solutions built on a business intelligence platform, announced today their selection as a finalist in the category of Most Innovative Vertical Industry Software for i-Performance.

Sponsored by The Computing Technology Industry Association (CompTIA), the Software Innovation Awards recognizes innovative software products and new business models in eight different categories.

Nominated for i-Performance, a single platform enterprise business intelligence suite with vertical specific content for multiple industries, Satori Group excels in the delivery of user friendly business management solutions that leverage bleeding edge technology for robust capabilities and rapid deployment. Customers ultimately benefit from the results provided by i-Performance; accurate actionable business insight enabling them to better understand, manage and respond to the demands of their industries.

"Satori Group is dedicated to the delivery of simplistic solutions that solve real and complex business challenges with rapid time to benefit and low total cost of ownership", said Satori Group President David Libesman. "We are excited about our status as a finalist and the recognition of the technological innovation of i-Performance particularly now as we are in process of preparing for the general release of V-i-Performance Planning, our virtual Business Performance Management solution."

Award winners will be announced at the Software Marketing Perspectives conference this May in Santa Clara, California.

About Satori Group, Inc.

Satori Group, Inc. is the premier provider of Business Performance Management solutions empowering small, mid-market, and divisions of large enterprise clients with reduced budget cycles, improved business decisions, and greater business and financial insight. V-i-Performance Planning is a unified, single source application suite for planning, budgeting, forecasting, analytics and reporting, dashboard and financial reporting offered as an on-premise or hosted virtual appliance solution.
